EDUCATION

Jaypee University of Engineering and Technology,

2027 | Guna, MP

B.Tech in Computer Science Engineering

- Secondary (Class 10th): 89%
- Senior Secondary (Class 12th): 76%

TECHNICAL SKILLS

Languages

C++, C, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries

Node.js, Express.js, React.js, MERN Stack

Cloud & APIs

Cloudinary API, JWT (JSON Web Tokens), REST APIs

Databases

MongoDB

Tools

Git, GitHub, Bcrypt

Core CS Fundamentals

Data Structures & Algorithms (DSA), DBMS, Operating Systems (OS), Computer Networks (CN)

ACHIEVEMENTS / CODING PROFILES

LeetCode

- 150+ Questions Solved (Proficient in Arrays, Strings, Linked Lists, Trees, and Graphs).

PROJECTS

Mini-YouTube, *Full-Stack Video Sharing Platform | MongoDB, Express.js, Node.js, Cloudinary API*

Developed a responsive full-stack video streaming application using the MERN stack allowing users to upload, view, and interact with video content.

- Integrated Cloudinary API for efficient cloud-based video storage and automated thumbnail generation.
- Implemented Secure Authentication using JWT and Bcrypt for password hashing.
- Engineered Real-Time Features including a "Like/Unlike" toggle system and nested comment sections using MongoDB's atomic operators.
- Designed a Responsive UI featuring a custom video player and a dedicated upload studio.

Project Name: OmniRoute – Multi-Vendor Retail SaaS Engine,

Tech Stack: MERN Stack, Tailwind CSS, Cloudinary API, WhatsApp Gateway

- **Role-Based RBAC:** Built secure Customer & Admin dashboard workflows using JWT and bcrypt authentication.
- **Live CRUD & Cloud Storage:** Developed an inventory console with live product synchronization and integrated **Cloudinary API** for image hosting.
- **Optimized Storefront:** Designed a reactive UI with instant client-side search-and-filter, persistent cart, and live order tracking.
- **Automated Order Routing:** Engineered a checkout pipeline mapping live transactions to MongoDB and automating vendor invoicing via **WhatsApp Deep Link Gateway**.
- **Business Analytics:** Integrated an admin data console calculating real-time **Total Earnings, Order Volume, and Top-Selling Products** for stock prediction.
